INSIDE THIS BROCHURE

A complete guide to Technomaze Technologies

This document introduces the company, explains our core capabilities, outlines how we work with clients, and summarizes practical engagement terms for starting a project with confidence.

01	Company profile, mission, vision, and values
02	Detailed service lines and deliverables
03	Industries and audiences we serve
04	Delivery process, quality controls, and support
05	Project requirements, FAQs, terms, privacy, and contact details

6 Core Service Domains

Web, software, mobile, consulting, cloud, and cybersecurity.

End-to-End Delivery

From discovery and strategy through build, launch, and support.

Business-Focused

Solutions are shaped around measurable operational value.

Zimbabwe-Based Reach

Professional support for local and growth-minded organizations.

COMPANY PROFILE

Technology solutions built for the real world

Technomaze Technologies bridges the gap between business ambition and practical digital execution. Our work helps clients modernize operations, improve service delivery, strengthen online presence, and build digital systems that can grow with them.

- We translate ideas into usable websites, software platforms, mobile apps, and digital workflows.
- We advise organizations on infrastructure, cloud readiness, cybersecurity, and digital transformation decisions.
- We focus on clean design, reliable engineering, user experience, maintainability, and measurable business outcomes.

MISSION AND VALUES

The standards behind our work

Mission

To deliver innovative and reliable technology solutions that empower businesses and organizations to thrive in a digital world.

Vision

To become a leading technology company known for creating impactful and scalable digital innovations.

Core Values

Innovation, integrity, reliability, customer success, and continuous improvement.

Delivery Promise

Practical technology, polished execution, clear communication, and dependable after-launch support.

Our approach

- Understand the client environment before prescribing technology.
- Prioritize usability, performance, data safety, and long-term maintainability.
- Communicate clearly so every project has traceable scope, priorities, timelines, and responsibilities.

SERVICES

Core capability detail

Web Development

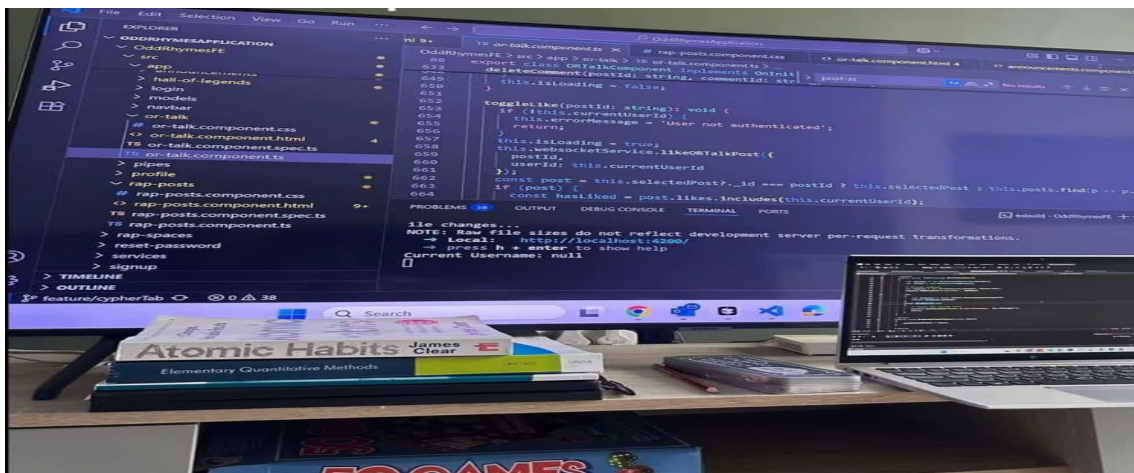

Responsive, modern, SEO-optimized websites that communicate trust and convert visitors into clients.

- Corporate and business websites
- Landing pages and organization portals
- Performance, accessibility, SEO, and mobile responsiveness
- Content structure, forms, analytics readiness, and launch support

Custom Software Development

Tailored systems that match exact workflows, reporting needs, and operational requirements.

- School management systems
- Inventory and accounting systems
- Booking, CRM, and workflow automation tools
- Dashboards, reports, role-based access, and integrations

SERVICES

More service capabilities

Mobile App Development

Android and iOS-ready experiences that connect organizations with customers, staff, and stakeholders.

- Customer service and self-service apps
- Internal workflow and field operation apps
- Secure API/backend integration
- Testing, deployment guidance, and version planning

IT Consulting

Digital strategy and infrastructure guidance for organizations that need clarity before investing.

- Technology audits and recommendations
- Digital transformation roadmaps
- Process improvement and system evaluation
- Procurement guidance and implementation planning

SERVICES

More service capabilities

Cloud Solutions

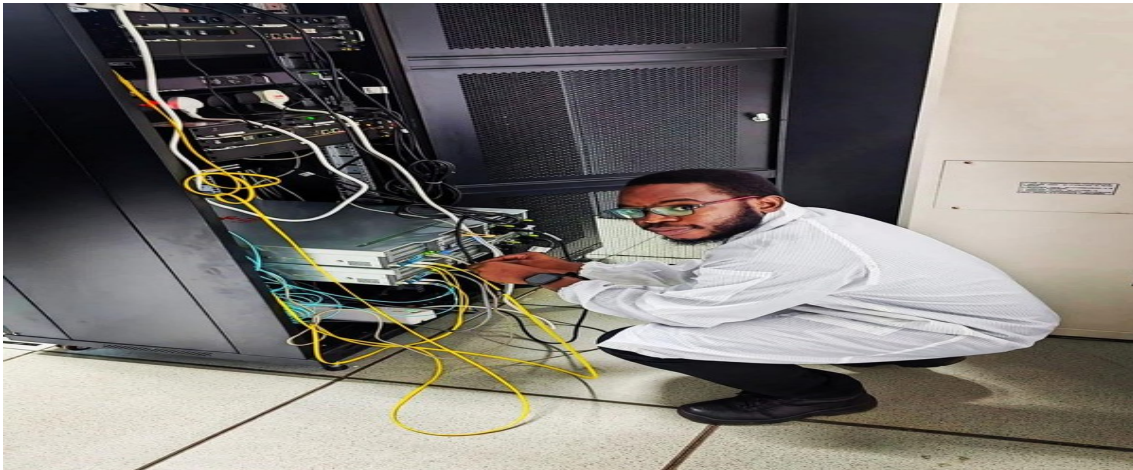

Hosting, deployment, and scalable infrastructure support for reliable digital operations.

- Cloud hosting and deployment
- Backups, monitoring, and availability planning
- Architecture for growth and maintainability
- Migration planning and environment setup

Cybersecurity Solutions

Security-focused assessments and safeguards that reduce risk and strengthen operational resilience.

- Security reviews and recommendations
- Infrastructure hardening and safer configuration
- Awareness support for safer digital operations
- Protection planning for systems, data, and access

WHO WE SERVE

Solutions for practical organizational growth

Technomaze Technologies supports clients that need technology to solve real operational problems, reach customers, improve service delivery, and compete in a connected market.

Small and Medium Businesses

Websites, systems, automation, reporting, and digital visibility for growing companies.

Schools and Training Institutions

Management systems, portals, communication tools, and workflow digitization.

Startups

MVPs, landing pages, product prototypes, apps, and scalable technical foundations.

Organizations and Enterprises

Consulting, infrastructure planning, cloud readiness, security, and support services.

DELIVERY PROCESS

How a project moves from idea to launch

A clear delivery method helps control expectations, reduce rework, and keep every stakeholder aligned from the first conversation to handover.

- **1. Discovery:** Understand objectives, users, current workflow, risks, content, timelines, and budget expectations.
- **2. Scope and Proposal:** Define deliverables, features, responsibilities, timeline, assumptions, and payment structure.
- **3. Design and Architecture:** Plan user experience, data structure, integrations, security, hosting, and the technical route.
- **4. Build and Review:** Develop in phases, share progress, gather feedback, test features, and refine details.
- **5. Launch:** Deploy, configure, verify production readiness, and support the go-live process.
- **6. Support and Growth:** Provide maintenance, improvements, monitoring guidance, and roadmap updates where required.

QUALITY AND SUPPORT

Built to be usable, reliable, and maintainable

Technology is only valuable when people can trust it daily. Our delivery priorities include performance, clarity, protection, and maintainability.

User Experience

Clear navigation, responsive layouts, accessible content, and interfaces designed for real users.

Performance

Fast-loading pages, optimized assets, scalable hosting choices, and efficient system behavior.

Security

Safer configurations, access controls, careful data handling, and security-conscious implementation.

Maintainability

Clean structure, documented handover where applicable, and support paths for future improvements.

Testing

Functional checks, mobile responsiveness, forms, links, deployment readiness, and user acceptance support.

After-Launch Care

Maintenance, updates, troubleshooting, feature improvements, and monitoring guidance depending on agreement.

STARTING A PROJECT

What to prepare before requesting a quote

A complete brief helps Technomaze Technologies respond faster and quote more accurately.

- Your organization name, contact person, email, and WhatsApp number.
- The service you need: website, custom software, mobile app, consulting, cloud, cybersecurity, or mixed support.
- The business problem you want solved and the audience/users who will use the solution.
- Key features, pages, forms, reports, integrations, or content requirements.
- Preferred timeline, budget expectations, examples you like, and any existing systems or brand assets.
- Support expectations after launch, such as maintenance, training, hosting, or ongoing improvements.

Recommended inquiry subject

Website Inquiry - [Service Name] / Project Consultation

FREQUENTLY ASKED QUESTIONS

Quick answers before we talk

- **How is pricing calculated?** Pricing depends on scope, features, complexity, timeline, integrations, content readiness, hosting, and support requirements.
- **Can Technomaze build a system from scratch?** Yes. Custom systems can be planned from discovery through design, development, testing, deployment, and support.
- **Do you support existing websites or systems?** Yes, depending on access, system condition, technology stack, and whether the requested work can be done safely.
- **Can you help choose the right technology?** Yes. IT consulting and discovery sessions help clarify the right route before major investment.
- **Is support included?** Support is agreed per project. It may include fixes, maintenance, hosting guidance, updates, monitoring, or additional improvements.

STANDARD TERMS AND CONDITIONS

Engagement terms summary

These terms provide general guidance. Final project terms are confirmed in written quotations, proposals, contracts, or service agreements.

- Website and brochure content is general information and does not replace a signed project agreement.
- Final scope, timelines, pricing, deliverables, revision limits, payment milestones, and support responsibilities must be confirmed in writing.
- A project may require client-supplied content, brand assets, credentials, approvals, test feedback, and timely communication to stay on schedule.
- Changes outside the approved scope may require a revised quote, added timeline, or separate change request.
- Technomaze Technologies retains rights to its brand, templates, internal methods, reusable know-how, and non-client-specific components unless otherwise agreed.
- Client-owned content, data, and approved project deliverables remain subject to the ownership terms agreed for that project.
- External platforms, hosting providers, payment services, social media, maps, email systems, and third-party tools are governed by their own policies and availability.
- Technomaze Technologies is not liable for losses caused by misuse, unauthorized access, third-party outages, unmanaged client changes, or reliance on informal estimates outside a written agreement.

PRIVACY AND DATA HANDLING

Responsible communication and project information

Technomaze Technologies uses submitted information to respond to inquiries, plan project discussions, prepare proposals, deliver services, and support client communication.

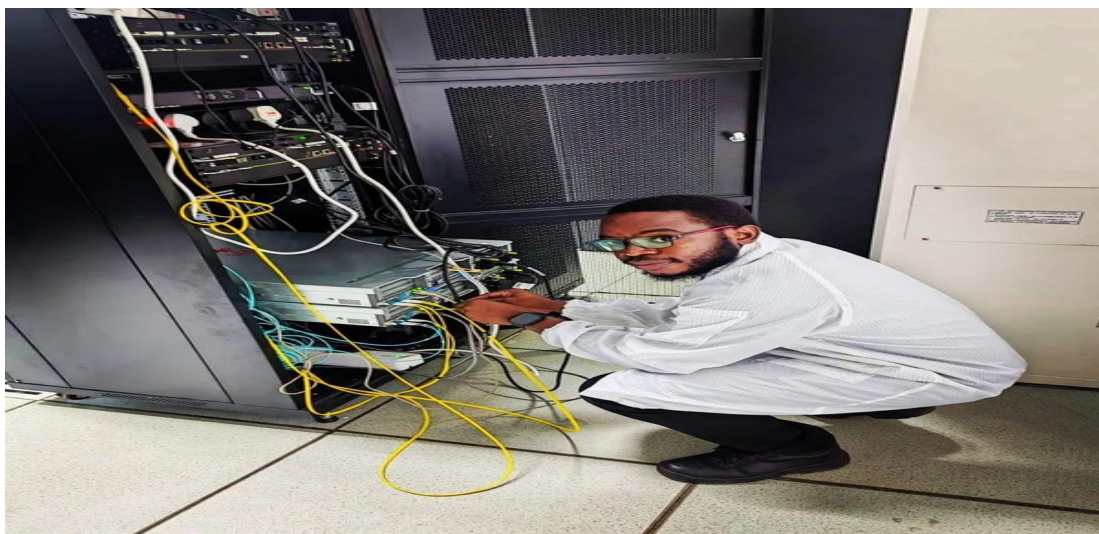

- Information shared through contact forms, email, WhatsApp, or consultation may include name, email, phone number, organization details, service interest, and project notes.
- Information is not sold. It may be processed through trusted tools such as email, WhatsApp, hosting, forms, analytics, project management, or cloud services.
- Project data and system credentials should be shared only through appropriate secure channels agreed with the client.
- No online communication method can be guaranteed completely secure, but reasonable steps are taken to protect information shared with the company.
- Clients may request correction or deletion of information they have shared by contacting services@technomazetechnologies.co.zw.
